

Eligible Hospitals / Critical Access Hospitals

How the Mississippi Health Information Network (MS-HIN) can assist you in meeting Meaningful Use requirements

The charts below define Stage 1 & Stage 2 Meaningful Use objectives associated with the electronic exchange of patient health information and describe how MS-HIN services can assist eligible hospitals (EHs) in meeting Meaningful Use objectives. *Table A* addresses Stage 1 requirements and *Table B* addresses Stage 2 requirements

Table A. Stage 1 Meaningful Use Requirements Associated with the Electronic Exchange of Information

Stage 1 Objective	Core or Menu Objective	Stage 1 Measure	MS-HIN Service
Provide patients with an electronic copy of their health information (including diagnostic test results, problem list medication list, medication allergies), upon request	Core	More than 50% of all patients of the inpatient or emergency departments of the eligible hospital or critical access hospital (CAH) (POS 21 or 23) who request an electronic copy of their health information are provided it within three business days	This service will be provided in future MS-HIN releases
Capability to exchange key clinical information (for example, problem list, medication list, medication allergies, diagnostic test results), among providers of care and patient authorized entities electronically	Core Eliminated from Stage 1 in 2013 and is no longer an objective for Stage 2.	Performed at least one test of certified EHR technology's capacity to electronically exchange key clinical information	Use MS-HIN Direct to send patient health information to other MS-HIN Direct users
The eligible hospital or Critical Access Hospital (CAH) that transitions their patient to another setting of care or provider of care or refers their patient to another provider of care should provide summary of care record for each transition of care or referral	Core	The eligible hospital or CAH that transitions or refers their patient to another setting of care or provider of care provides a summary of care record for more than 50% of transitions of care and referrals	MS-HIN's robust HIE capabilities allow for providers to exchange Continuity of Care Documents (CCDs) through the Community Health record (CHR) or utilizing MS-HIN Direct Services
Capability to submit electronic data to	Core	Performed at least one test of certified EHR	Use MS-HIN's Public Health

Stage 1 Objective	Core or Menu Objective	Stage 1 Measure	MS-HIN Service
immunization registries or Immunization Information Systems and actual submission except where prohibited and in accordance with applicable law and practice		technology's capacity to submit electronic data to Immunization registries and follow up submission if the test is successful (unless none of the immunization registries to which the eligible hospital or CAH submits such information has the capacity to receive the information electronically)	Gateway capabilities to electronically exchange data with the Department of Health's Mississippi Immunization Information eXchange (MIIX)
Capability to submit electronic data on reportable (as required by state or local law) lab results to public health agencies and actual submission except where prohibited and in accordance with applicable law and practice	Core	Performed at least one test of certified EHR technology's capacity to provide electronic submission of reportable lab results to public health agencies and follow-up submission if the test is successful (unless none of the public health agencies to which eligible hospital or CAH submits such information has the capacity to receive the information electronically)	Use MS-HIN's Public Health Gateway capabilities to electronically submit lab results to the Department of Health
Capability to submit electronic syndromic surveillance data to public health agencies and actual submission except where prohibited and in accordance with applicable law and practice	Core	Performed at least one test of certified EHR technology's capacity to provide electronic syndromic surveillance data to public health agencies and follow-up submission if the test is successful (unless none of the public health agencies to which an eligible hospital or CAH submits such information has the capacity to receive the information electronically)	Use MS-HIN's Public Health Gateway capabilities to electronically submit surveillance data to the Department of Health

Table B. Stage 2 Meaningful Use Requirements Associated with the Electronic Exchange of Information

Stage 2 Objective	Core or Menu Objective?	Stage 2 Measure	MS-HIN Service that Meets Objective
Provide patients the ability to view online, download and transmit their health information within 36 hours after discharge from the hospital	Core	1. More than 50% of all unique patients discharged from the inpatient or emergency departments of the eligible hospital or CAH (POS 21 or 23) during the EHR reporting period are provided timely (available to the patient within 36 hours after discharge from the hospital) online access to their health information 2. More than 5% of all unique patients discharged from the inpatient or emergency departments of the eligible hospital or CAH (POS 21 or 23) during the EHR reporting period (or their authorized representatives) view, download, or transmit to a third party their health information	This service will be provided in future MS-HIN releases
The eligible hospital or CAH that transitions their patient to another setting of care or provider of care or refers their patient to another provider of care should provide summary of care record for each transition of care or referral	Core	1. The eligible hospital, or CAH that transitions or refers their patient to another setting of care or provider of care provides a summary of care record for more than 50% of transitions of care and referrals 2. The eligible hospital or CAH that transitions or refers their patient to another setting of care or provider of care provides a summary of care record either a) electronically transmitted to a recipient using Certified EHR Technology or b) where the recipient receives the summary of care record via	MS-HIN's robust HIE capabilities allow for providers to exchange Continuity of Care Documents (CCDs) through the Community Health Record or utilizing the MS-HIN Direct Services

Stage 2 Objective	Core or Menu Objective?	Stage 2 Measure	MS-HIN Service that Meets Objective
		exchange facilitated by an organization that is a NwHIN Exchange participant or is validated through an ONC-established governance mechanism to facilitate exchange for 10% of transitions and referrals	
Capability to submit electronic data to immunization registries or Immunization Information Systems and actual submission except where prohibited and in accordance with applicable law and practice	Core	Successful ongoing submission of electronic immunization data from Certified EHR Technology to an immunization registry or immunization information system for the entire EHR reporting period	Use MS-HIN's Public Health Gateway capabilities to electronically exchange data with the Department of Health's Mississippi Immunization Information eXchange (MIIX)
Capability to submit electronic data on reportable (as required by state or local law) lab results to public health agencies and actual submission except where prohibited and in accordance with applicable law and practice	Core	Successful ongoing submission of electronic reportable laboratory results from Certified EHR Technology to public health agencies for the entire EHR reporting period as authorized, and in accordance with applicable State law and practice	Use MS-HIN's Public Health Gateway capabilities to electronically submit lab results to the Department of Health
Capability to submit electronic syndromic surveillance data to public health agencies and actual submission except where prohibited and in accordance with applicable law and practice	Core	Performed at least one test of certified EHR technology's capacity to provide electronic syndromic surveillance data to public health agencies and follow-up submission if the test is successful (unless none of the public health agencies to which an eligible hospital or CAH submits such information has the capacity to receive the information electronically)	Use MS-HIN's Public Health Gateway capabilities to electrically submit surveillance data to the Department of Health
